

MEASURING FOR ROMAN SHADES

CHOOSE A MOUNT TYPE:

INSIDE MOUNT

- Mounted inside your window's frame
- Provides a clean, built-in look
- Leaves attractive woodwork exposed
- There is a $\frac{3}{4}$ " minimum amount of space needed for this mount type. We call this measurement the minimum depth requirement.

STEP 1

Because not all windows are perfect rectangles, we recommend measuring the window in 3 places to get your width: across the top, middle and bottom: across the top, middle and bottom (see diagram above). Round all measurements to nearest $\frac{1}{8}$ ". Take smallest number. This is your ordering width. We will make the necessary deductions (approx. $\frac{3}{8}$ "- $\frac{1}{2}$ ")

STEP 2

Finding the length is a similar process, measuring the length of the window in 3 places on the window: left, center and right. Round all measurements to nearest $\frac{1}{8}$ ". Take largest number. This is your ordering length.

OUTSIDE MOUNT

- Mounted outside or on top of the window's frame
- Provides a taller, more dramatic appearance
- There is no minimum depth requirement

STEP 1

Measure the width of the area you wish to cover.

If space allows we recommend adding 2-3" (1 - $\frac{1}{2}$ " each side) to this measurement to help eliminate light seepage. This is your ordering width and will be the overall measurement of the shade.

STEP 2

Measure the height of the area you wish to cover. This is your ordering length.

Workroom Notes:

- For outside mount shades with upholstered valances, please note the valance will be 1" wider than your ordered width due to returns.
